Rumbam Engineers Ltd has a well-respected professional history since 1994, which is reflected in the many and varied engineering projects which have been successfully completed throughout Papua New Guinea. **We are recognized by our peers as a leading nationally owned engineering consultancy firm**, providing professional services in a number of engineering and building disciplines. Starting out in the civil engineering design, documentation, and project management of roads, subdivisions and drainage, we have grown into a competitive professional engineering consultancy and in the process, have branched out into several other related fields.

Today, Rumbam Engineers is a **multi-disciplinary firm** with in-house capacity to provide consultancy in the fields of civil engineering, transportation, aviation, water resources/waste water and environmental engineering, architecture and building including the provision of project management services. We have forged lifelong ties with other professionals who have played a key role in our success. Such out-sourced services cover the fields of Land and Hydrographic Survey, Structural Design and Urban Planning. Our client base extends from individuals to government agencies and the corporate sector.

We are currently located on Level One, Suite Two; RDF House, Jacksons Parade, 7 Mile, Port Moresby.

We have a professional team which develops cost effective solutions that are functional, efficient and focused on adding value to client expectations. **We have the capability and expertise available to provide the following consultancy services;**

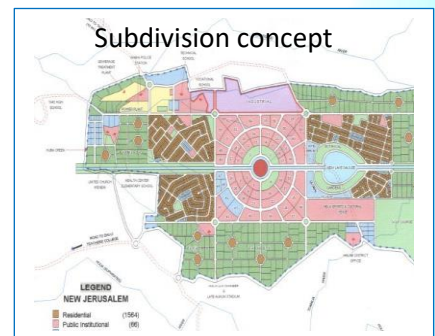

- *Architecture & Building*
- *Aviation Engineering*
- *Civil Engineering (subdivisions, roads & drainage etc.)*
- *Marine Engineering*
- *Project Management & Planning*
- *Structural Design*
- *Surveying (Land and Hydrographic)*
- *Transportation Engineering*
- *Water Resources/waste water engineering*

Civil Engineering Design and Supervision

Project Management & Contract Administration (civil works)

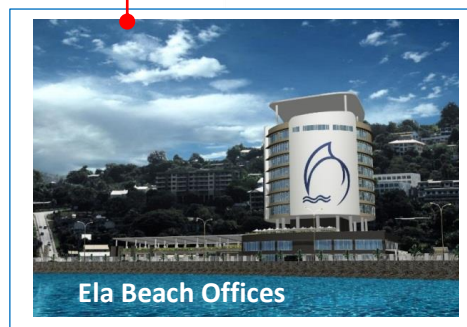

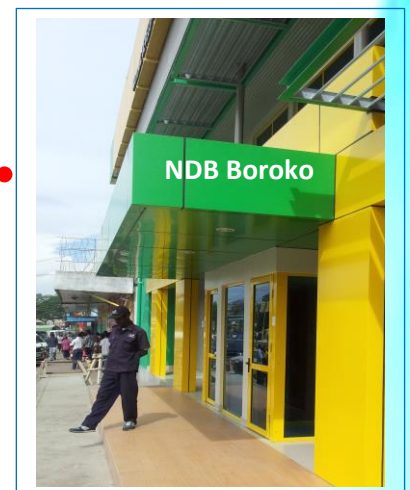

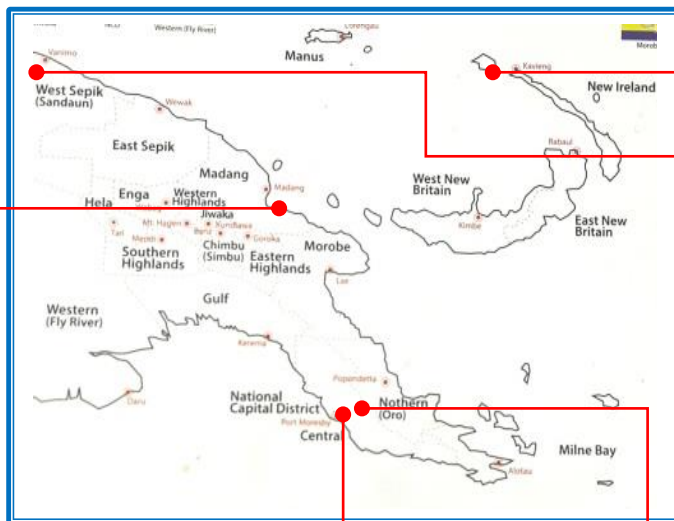

Project Management & Contract Administration (Building works)

Architectural concept

ARCHITECTURE & BUILDING

Rumbam Engineers Ltd also provides consultancy in Architecture and Building. We have completed design and documentation of buildings, received statutory approvals, completed tender processes, produced contract documents and supervised contracts to successful completion in several locations throughout Papua New Guinea including; Wewak, Madang and Kavieng. In Port Moresby we have completed projects in Boroko and Kanudi. We have also completed design projects in Gordons and the Ela Beach waterfront in NCD.

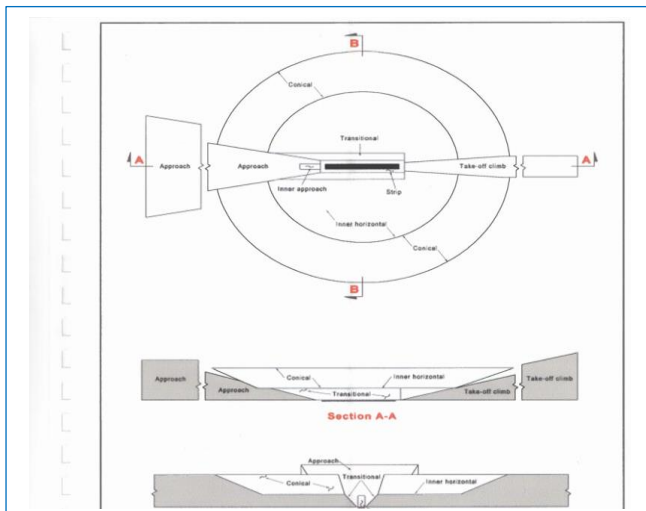

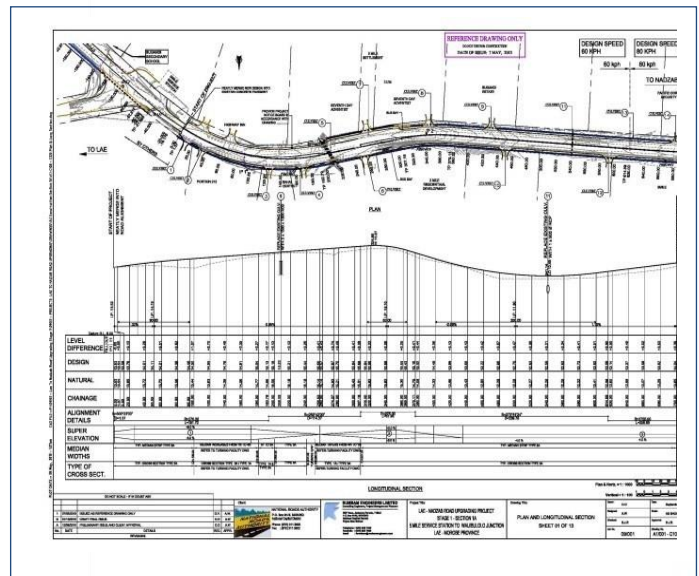

AVIATION

For the Aviation Industry, Rumbam Engineers has in July 2000 carried out a Feasibility Study for the relocation in the Chimbu Province of the main airport facility from Kundiawa to Kerowagi and in April 2011, for PNG Air Services; Rumbam Engineers provided consultancy for their new Air Transport Management System (ATMS)

CIVIL ENGINEERING

Our core business is Civil Engineering. We provide a total package from Conceptual and Preliminary Design through to Feasibility Studies and Cost Estimation always giving professional engineering advice, such that the most appropriate engineering design solution can be documented for construction, followed up with strict quality assurance in the supervision of contracts during the Construction Stage.

Malolo Estates Subdivision
Infrastructure; 8 Mile, NCD

Rumbam Engineers Ltd has provided for the Government of PNG a Design Review of the Pacific Marine Industrial Zone (PMIZ) based in Madang and provided Project Management Service to coordinate the Engineering Design of this large Marine Infrastructure Project.

A 3D architectural rendering of a bridge structure. It features a main bridge deck supported by several vertical pillars. A ramp with a yellow safety railing leads up to the bridge deck. A set of stairs is visible on the right side of the bridge. The bridge is situated over a body of water, and there are some red structures on the ground level.

PROJECT MANAGEMENT & PLANNING

Rumbam Engineers can manage projects from inception through various design concepts and design development stages, continuing onto consolidated documentation, while coordinating relevant professionals that impact the project with their input, including all statutory requirements and eventual realisation at construction stage. Indeed, we go the extra mile by ensuring the strictest of quality assurance procedures in contract management, to ensure our clients get the best value for their money.

Where overseas based professionals are commissioned to do projects in PNG, local engineers are involved to satisfy the by-laws governing in-country infrastructure development. We have collaborated with overseas based professionals in several such projects.

IEA recently engaged an overseas based firm to produce concepts for the renewal and redevelopment of their Ela Beach site. Rumbam Engineers was a sub consultant in this design project

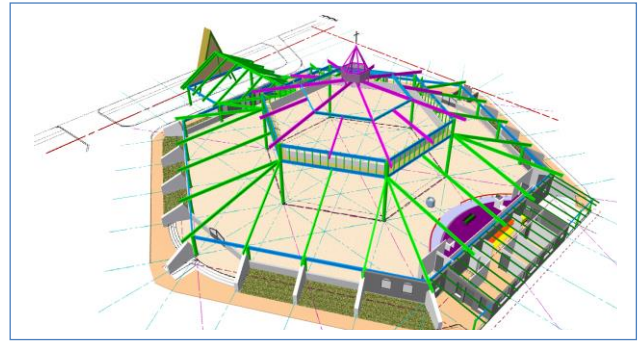

Design Review utilising local knowledge that accounts for conditions that may have been overlooked or unaccounted for is a major factor in ensuring that engineering design solutions are most suited to its locality and sustainable in the long run

STRUCTURAL DESIGN

Structural Engineering is a related activity and Rumbam Engineers Ltd provides structural design of structures associated with Civil Engineering such as bridges, culverts, retaining walls, crash barriers, bollards and the like. We also have associated engineers who provide structural analysis of buildings, communication towers and other such structures to ensure structural adequacy and public safety and provide structural adequacy certificates pertaining to individual structures for our clients. We have formed working relations with other partners, upon whom we can call on, to provide for our clients' other specialist services, such as Geotechnical Engineering and others.

SURVEYING

As a sub consultant on the IEA Urban Renewal Project recently, Rumbam Engineers has produced topographical surveys assisting overseas based consultants for the purpose of Town Planning Applications. We have also provided land surveying assistance in various other civil engineering projects we have been involved in throughout Papua New Guinea.

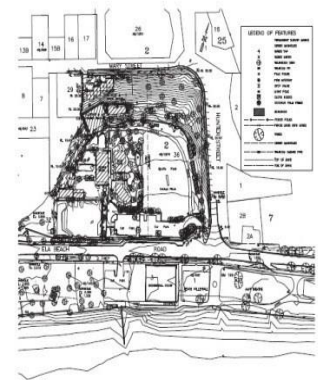

Recently for the purpose of underwater lease application for our client, we have completed a hydrographical survey of part of the Port Moresby harbour surrounding the area known as Idumawa Point.

Boundary identification, cadastral and survey investigations are part and parcel of land mediations in the Construction Industry.

SITE SURVEY

This is a site survey for the purpose of the IEA Urban Renewal Project. The site is located in the Port Moresby Harbour, near Idumawa Point. The survey was carried out on the 15th of May 2017. The site is located in the Port Moresby Harbour, near Idumawa Point. The survey was carried out on the 15th of May 2017. The site is located in the Port Moresby Harbour, near Idumawa Point. The survey was carried out on the 15th of May 2017.

SURVEY PLAN

TRANSPORTATION

For the National Roads Authority in 2013, Rumbam Engineers surveyed and designed the four lane; Lae to Nadzab road in the Morobe Province. The brief included all civil infrastructure including drainage, culverts, bridges, signage, safety structures, pavement specifications and retaining walls.

Also, in 2013 for the Airways Development, we were engaged to design a two lane; Airways to Bootless Bay Road in Port Moresby, NCD.

In 2016 we were engaged by NCDC to oversee the construction by China Harbour Railway Engineering of the Koura Way to Badihagwa road Project.

All designs utilise primarily Cad software such as Civil Cad and AutoCAD.

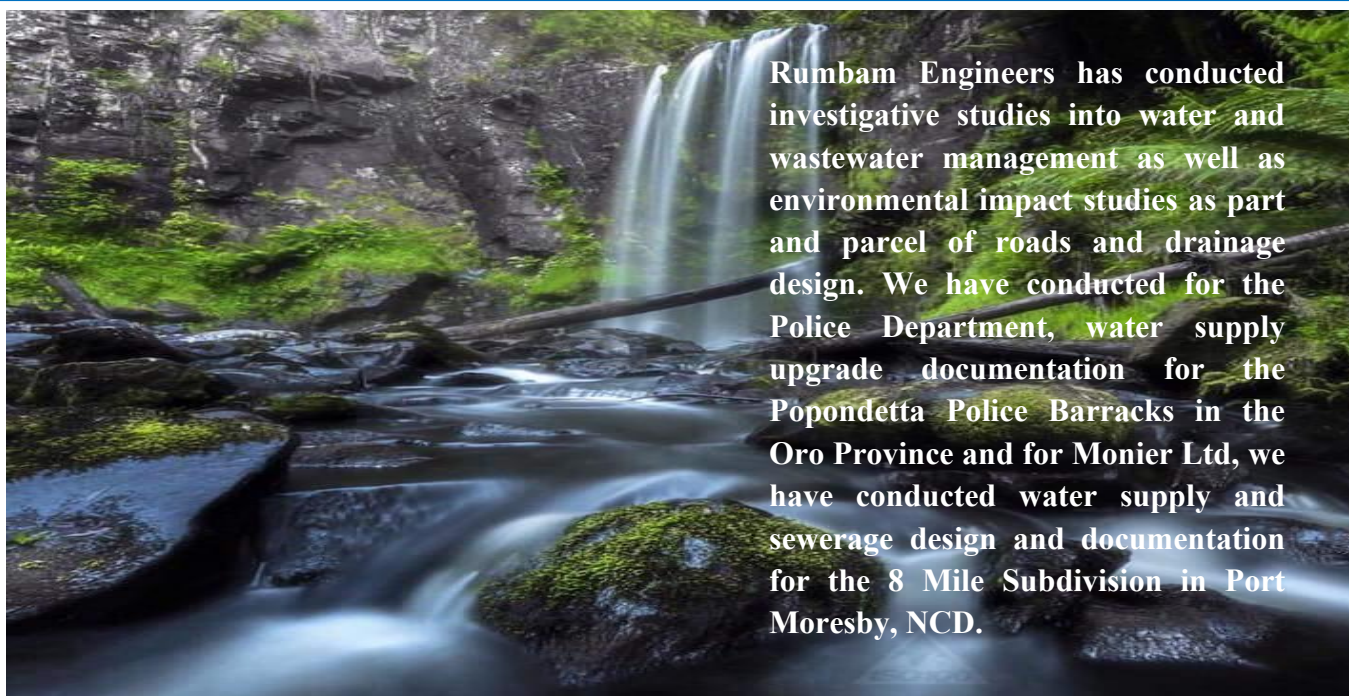

Road Infrastructure: Lae to Nazab

Culvert Installations

WATER RESOURCES/WASTE WATER ENGINEERING

Rumbam Engineers has conducted investigative studies into water and wastewater management as well as environmental impact studies as part and parcel of roads and drainage design. We have conducted for the Police Department, water supply upgrade documentation for the Popondetta Police Barracks in the Oro Province and for Monier Ltd, we have conducted water supply and sewerage design and documentation for the 8 Mile Subdivision in Port Moresby, NCD.

KEY PERSONNEL

COMPANY DIRECTOR; BAMAKE RUMBAM

Since Bamake Rumbam formed this engineering consultancy company in 1994, he has been actively involved in the pursuit of professional engineering excellence, retaining key roles in major projects undertaken by Rumbam Engineers Ltd. In the process he has enhanced the company's reputation for understanding clients' requirements while always giving professional advice such that the most appropriate engineering solutions meet developmental goals.

Bamake Rumbam encourages the company's continuing commitment to excellence using the collective knowledge of the best available Papua New Guinean professionals in engineering and related fields. He will actively participate in early conceptual stages to bring the best ideas forward in any development undertaken by us.

Bamake Rumbam has a bachelor of civil engineering degree from the PNG University of Technology. Graduating in 1979 he has vast experience in municipal and civil engineering and has held several high-level posts in both the private and public sectors within PNG. He is a fellow of the Society of Professional Engineers PNG Chapter.

HIGHWAY ENGINEER (CIVIL); TERENCE OFOI

Terence Ofoi is a 2013 graduate of the PNG University of Technology with a bachelor of civil engineering degree. He joined Rumbam Engineers in 2023 and brings with him a vast array of knowledge and experience in allied fields such as hydrological surveys and studies, geotechnical investigations, seismic design, hydraulics engineering, waste water/sewerage and environmental engineering, water supply and micro hydro schemes, marine engineering including off-shore dredging as well as civil engineering on highways, roads and bridges.

With a critical eye and analytical approach, Terence is in charge of civil engineering design and provides the basis for appropriate and innovative design solutions to problems presented by project demands, ensuring always that there is long term sustainability in project outcomes. Under his stewardship, our technical team endeavours to produce documentation that is professional and that our end product exceeds client expectations, in keeping with our goal of striving for professional engineering excellence.

Terence Ofoi is a member of the PNG Institute of Engineers and registered with the society of professional engineers to provide professional engineering services in PNG.

SENIOR ARCHITECT; IAN TABARA

Ian Tabara graduated from the PNG University of Technology with a bachelor of architecture and Building degree in 1981. He joined Rumbam Engineers in 2013 and gives our company extra capacity in architectural design of houses, flats, townhouses, warehouses, low to high rise apartments, retail shops, offices, hotels, resorts and public buildings as well as urban restorative and renewal developments.

He has extensive experience in project management of foreign aid-based projects in liaison with government departments such as Education, Health and Police Departments and understands the complexities of working in remote areas in nearly all provinces of Papua New Guinea where he has worked individually or, as a team leader, in collaboration with overseas based professional engineers and architects.

In relation to architectural design, Ian Tabara strives for excellence in architecture and this falls in line with Rumbam Engineers goal of striving for professional engineering excellence.

Ian Tabara is a member of the PNG Institute of Architects and registered with the PNG Board of Architects to practice architecture in PNG.

PORT/ MARINE INFRASTRUCTURE SPECIALIST; LUKE KYOKAL NIAP

Luke Niap is a 1979 graduate of the PNG University of Technology with a bachelor of Civil Engineering degree. Since graduation Luke has spent most of his professional life in the field of marine infrastructure; from studies and analysis to design and project management of port facilities and developments throughout PNG. He has extensive experience in marine and ports engineering with work experience in PNG and Australia. Luke Niap's inclusion in the Rumbam Engineers team gives our company a depth of knowledge in marine engineering that is very high in PNG. Luke Niap is a member of the PNG Institute of Engineers and registered with the institute of engineers to provide professional engineering services in PNG. He is also a member of the Australian Institute of Company Directors

SENIOR CIVIL ENGINEER; INAWI KAIDA

Inawi Kaida graduated from the PNG University of Technology with a bachelor of civil engineering degree in 1978. Inawi has been with the firm for all most four years now.

Mr. Kaida's expertise and experience over the last 36 years is in civil design and documentation of major civil works within PNG. He has vast experience in; Project supervision of major roads and sub-division. Mr. Kaida is fully conversant with the construction supervision and design and documentation.

Inawi Kaida is a member of the PNG Institute of Engineers and registered with the society of professional engineers to provide professional engineering services in PNG.

GEOTECHNICAL ENGINEER; ANDREW GALORE

Andrew Galore graduated from then PNG University of Technology with a bachelor of civil engineering degree in 1994. Andrew is a senior geotechnical engineer who has more than 31 years of experience. He is a Senior Geotechnical Engineer responsible for all highway roads, urban roads and subdivisions geotechnical investigations. Some of his key areas of competence are;

- ✓ Project Management and Documentation
- ✓ Highway and Urban Road Works Design and Supervision,
- ✓ Municipal Engineering, Water Supply, Sewerage and Drainage,
- ✓ Project Formulation and Implementation.

Andrew Galore is a member of PNG Institute of Engineers and registered with the society of professional engineers to provide professional engineering services in PNG.

Contract administration, Kavieng

Airways to Bootless Bay Access, Port Moresby, NCD

SENIOR DESIGN AUTOCAD CIVIL 3D OPERATOR/DRAFTSMAN; API FOROVA

Api Forova graduated from the Lae Technical College with a Stage 1, Civil Engineering Certificate in 1977. He joined Rumbam Engineers in 2023 as a Senior Design Civil 3D Operator/Draftsman and is dealing with road and drainage infrastructure.

Api's experience is in the design, inspection and supervision of roads, drainage, hydraulics, sewerage and waste water management, including project management of civil engineering works.

Api's expertise strengthens the capacity of Rumbam Engineers in keeping with our goal of achieving professional engineering excellence.

DRAFTSMAN/CAD OPERATOR; VERIUS LAUGAGAYO

Verius Laugagayo graduated from the Goroka Technical College with a Certificate in Civil Engineering in 1985. He joined Rumbam Engineers in 2018 as a draftsman dealing with road, bridges and drainage infrastructure.

Verius's experience is in the civil drafting of roads, drainage, hydraulics, sewerage and civil structural works.

Verius's expertise strengthens the capacity of Rumbam Engineers in keeping with our goal of achieving professional engineering excellence.

DRAFTSMAN/CAD OPERATOR; DAVID VALLIKAY

David Vallikay graduated from the Lae Technical College in 1985 with a Certificate in Civil Engineering.

He joined Rumbam Engineers in 2011 bringing with him a vast array of knowledge in technical drawings, quantity take-offs, quality assurance methods and CAD documentation in various disciplines including structural and civil engineering, hydraulics, water supply and sewerage, storm water and drainage, as well as architectural design and working drawings.

David is responsible for our technical drafting team ensuring quality assurance of our technical documentation from drawings to take-offs, compilation for various drawing issue stages and with our team of CAD operators and draftsmen, provides Rumbam Engineers a secure back-up to our professional engineering team.

**SENIOR DESIGN AUTOCAD CIVIL 3D
OPERATOR /DRAFTSMAN; MORRIS
DIDIBU**

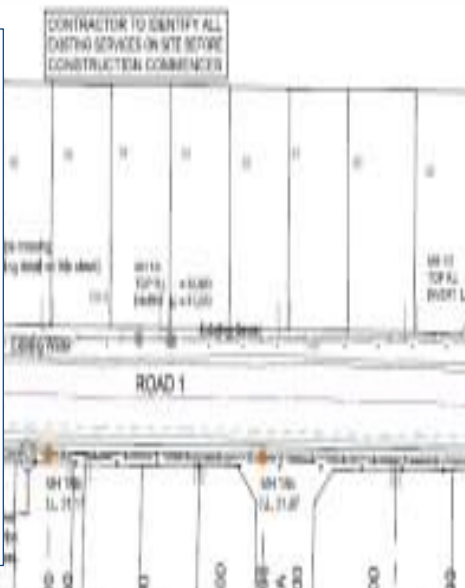

Morris DIdibu graduated with Civil Engineering Drafting Certificate, Lae Technical College, 2003 Level 2 Drafting Certificate, Southpac Industrial Training Solutions (POM) 2007 Auto Cad Civil 3D, Customs 2013. Cardno University 2013. Mr. Didibu has over thirteen (13) years of experience in engineering and structural design and drafting works. He is very proficient with the use of AutoCAD and AutoCAD Civil3D design aids and also is very proficient with various computer programs like Global mapper, MapInfo, Oziexplorer and Microsoft Office; i.e., MS Word, MS Excel and MS Project
